

To Residents of Nakatsu City

Starting on September 1, 2022, a garbage bags charging system will come into effect.

To become a city which coexists with environment through promotion of a recycling-based society and realization of a decarbonized society to help reduce its environmental impact as much as possible, we need to make further efforts to reduce waste and turn it into valuable resources. As part of the initiative to reduce waste and turn it into valuable resources, the city will implement a garbage bags charging system.

◎ How to put out the garbage once the system has been implemented

Starting on September, for household garbage, you need to **use designated garbage bags to dispose of “burnable” and “non-burnable”** garbage. You can dispose of other garbage just as you always have.

How to put out garbage starting on September 1, 2022

Type of garbage	How to put out garbage starting on September	
Burnable garbage	Disposal fees are charged	Designated garbage bags
Non-burnable garbage		
Glass bottles, cans	Same as before	Transparent plastic bags (of 45 L or smaller)
PET bottles		
Resource plastic		
Hazardous garbage		
Waste papers, used cloths, miscellaneous papers		

Garbage that can be put out without using designated garbage bags

- Paper diapers, Ostomy appliances, Empty bags of peritoneal dialysis fluid**: Sort garbage by type, place it in separate **transparent plastic bags (of 45 L or smaller)**, and dispose of it at your collection site on the burnable garbage collection day.
 - *Do not mix garbage that is NOT listed.
 - *Place **pruned branches** in **designated garbage bags** and dispose of them at your collection site on the burnable garbage collection day.
- Grass, fallen leaves**: Same as above.
- Waste collected through volunteer cleanups**: Place it in dedicated bags for “Nakatsu City Cleanup Group (registration required)” or those handed out to neighborhood association members for neighborhood cleanups, and dispose of it at your collection site.

◎ Design of Nakatsu City designated garbage bags

Plant-based biomass materials are used for these bags.

Sizes/prices of designated garbage bags

Type of bag	Size	Fee per pack (set of 10 bags)
Burnable garbage (pink)	10 L	100 yen
	20 L	200 yen
